Competition entry shortlisted 2008

Tribeca Infobox is the temporary marketing suite for a substantial regeneration project in Liverpool by Urban Splash. Our proposal seeks to reconnect the development site with the City. Taking inspiration from the Yellow Submarine, the pavilion incorporates three periscopes angled to provide views across the development site towards Liverpool's most iconic landmarks; the Pierhead, the docks and the Anglican Cathedral. The periscopes will capture the imagination of the local community, giving the site a context in relation to the city and advertising the new development. There were over 100 competition entries and this scheme reached the final shortlist of three.
